Motorised Elevated Work Platform REFRESHER TRAINING COURSE

MEWP

Course Programme and Criteria

It is the policy of ANTS to provide a quality-training programme for all candidates attending MEWP courses on and off site.

We run beginners, experienced and refresher courses on scissors, boom and vertical boom lifts for all types of machines.

It is up to the employer to ensure that candidates are selected to attend the appropriate courses outlined above.

All courses are delivered by qualified instructors to the highest IPAF standard.

ON SITE TRAINING:

A copy of the current Certificate of Thorough Examination for each MEWP will be required. Appropriate P.P.E. may be required for use by all candidates.

Outlined below are programme details and candidates experience requirements for attending MEWP training courses.

All courses are run to the criteria laid out by the Health & Safety at Work Act (2005) and Working at Height Regulations (2007).

Candidates or Employer must provide proof of previous training for all trainees attending (cert for specific MEWP)

The course duration is ½ day for up to 3 people.

This course can be run for 6 people on a one-day basis with one theory and two practical sessions.

On successful completion of the course, candidates will be able to:

Carry out pre-use checks on the MEWP and HARNESS correctly.

Operate an MEWP safely and correctly in accordance with the manufacturers handbook.

Clearly understand the causes of instability while operating an MEWP.

Work safely at height.

Understand fully emergency lowering procedures.

All candidates will be issued with a Certificate of Competency on completion of the course and practical test.

Theory Session

Safety Health and Welfare at Work Act 2005 & 2007 Regulations.

MEWP maintenance

Introduction to controls

Stabilities

Observation Skills

Safety Harness Training

Harness inspection, lanyard anchor points wearing of harness.

Use of P.P.E.

Working at height

Awareness of electricity in work areas.

Falls

Changing stabilities at height.

DVD on operation of MEWP & awareness of electricity.

Practical:

Daily pre-use checks and maintenance

Re-fuelling and battery charging procedures

Harness inspection

Emergency lowering procedures

Raising and lowering MEWP safely and correctly

Manoeuvring MEWP in confined areas safely

Risk assessing ground for stability of the MEWP

Emergency procedures

Practical Test / Theory Test.
